<p>Though apparently two different periods, bldgs. <i>71-73</i> share a party wall (also connected to 69 and <i>75</i> West respectively). Though greatly altered, <i>71</i> perhaps as early as 1790, roof of metal with dormer, triangular with returns (6/6) 2nd and 3rd stories have 3 windows @ (6/6), but one on 2nd completely altered. Proportions are good.</p> <p><i>73</i> is so altered as to be unrecognizable, but perhaps 1840 roof slope same as <i>71</i>. Bldg. is important for it ties together this whole block of four buildings of different periods but homogenous re: scale, size, use etc. <i>71</i> definitely worth reconstruction and <i>73</i> worthy of preservation by location, but probably "old" by its own merit</p>

<p>Three storey flat roofed building with unadorned but well-proportioned facade. Ground floor probably originally intended for store front of some sort, however, present bar front is obviously not original. 2nd storey windows, 6/1 (originally 6/6) are of equal size and are framed by a simple sash and flat wood lintel. The windows have louvered shutters, however, the shutters on the 2nd storey are smaller in size and may be replacements. The cornice is a simple wooden one overhanging c. 1'. The front wall is painted red and the effect caused by the red and the black windows and shutters and white sash, is very striking. (The paint on the front is flaking, otherwise bldg. looks in fairly good shape. The bldg. goes back from the street c. 100 + feet and the bldg. is larger than appears. The west side borders on Larkin Street and is unpainted stucco. The west side window sash is original but unpainted and in need of treatment. The building needs little to be very attractive integral part of streetscape.</p>
